A light air Latter much the same saw a finback
and a Bark Lat 9-06 S Long 8-32 E

Sunday September 30th 1877

A fresh gale from S W by S Latter part a light wind

To MAKE good coffee, says a correspondent, use about one table-spoonful for each person, and one egg mixed with it. Place this in a coffee-pot, put in a little cold water, then the desired amount of boiling water; place upon the stove and let it come to a boil. If no egg is used, it should never boil over half a minute. If an egg is used, it may boil two minutes, when it will be ready for use. The coffee-pot should be as close as possible, so as to retain the flavor. The object of using a little cold water is to give a little time for hot water to extract its virtues before it boils.

don't consarn him. We make up, here, by learnin' to
human natur 'stead o' books, and a mighty surprisin'
sort o' study it is, you bet."

"But education does concern you, Bill," said Rhodie.

"If you had education to back your talent and your *cour-*
age, Bill, you'd make a big figure in the world."

"So you think I have talent, Rhodie?" said the boy,
with a flush of pride.

"Undoubtedly."

"And— and courage, Rhodie?"

Bark Mousseau Sperm Whaling

Sunday September 30th 1877

A fresh gale from S.W. by S. Latter part wind much
Same at 10 A.M. Saw sperm whales loweret in
company with the Merman of Westport and
struck 5 and saved 3 the Starboard Boat and the

A CURE FOR EARACHE.

There is scarcely any ache to which children are subject so bad to bear, and difficult to cure, as the earache. But there is a remedy never known to fail. Take a bit of cotton-batting, put upon it a pinch of black pepper, gather it up and tie it, dip in sweet oil, and insert into the ear. Put a flannel bandage over the head to keep it warm. It will give immediate relief.

THE FLYING POST.

FROM THE DANISH.

Fritz Bagger had that very day passed his judicial examination, and was sitting in his lodgings in — Street, Copenhagen, in a very happy

pub
